# Science

## Simple Machines...

Force, Motion, & Energy

help do work with less force

### Lever

a rod balanced on a fixed point that can help lift a heavy object

### Inclined Plane

slope or ramp that makes it easier to lift something

### Wheel & Axle

used to carry loads around easily for long distances with less effort

### Pulley

uses wheels and a rope to raise, lower, or move a load

### Screw

an inclined plane wrapped in a spiral

### wedge

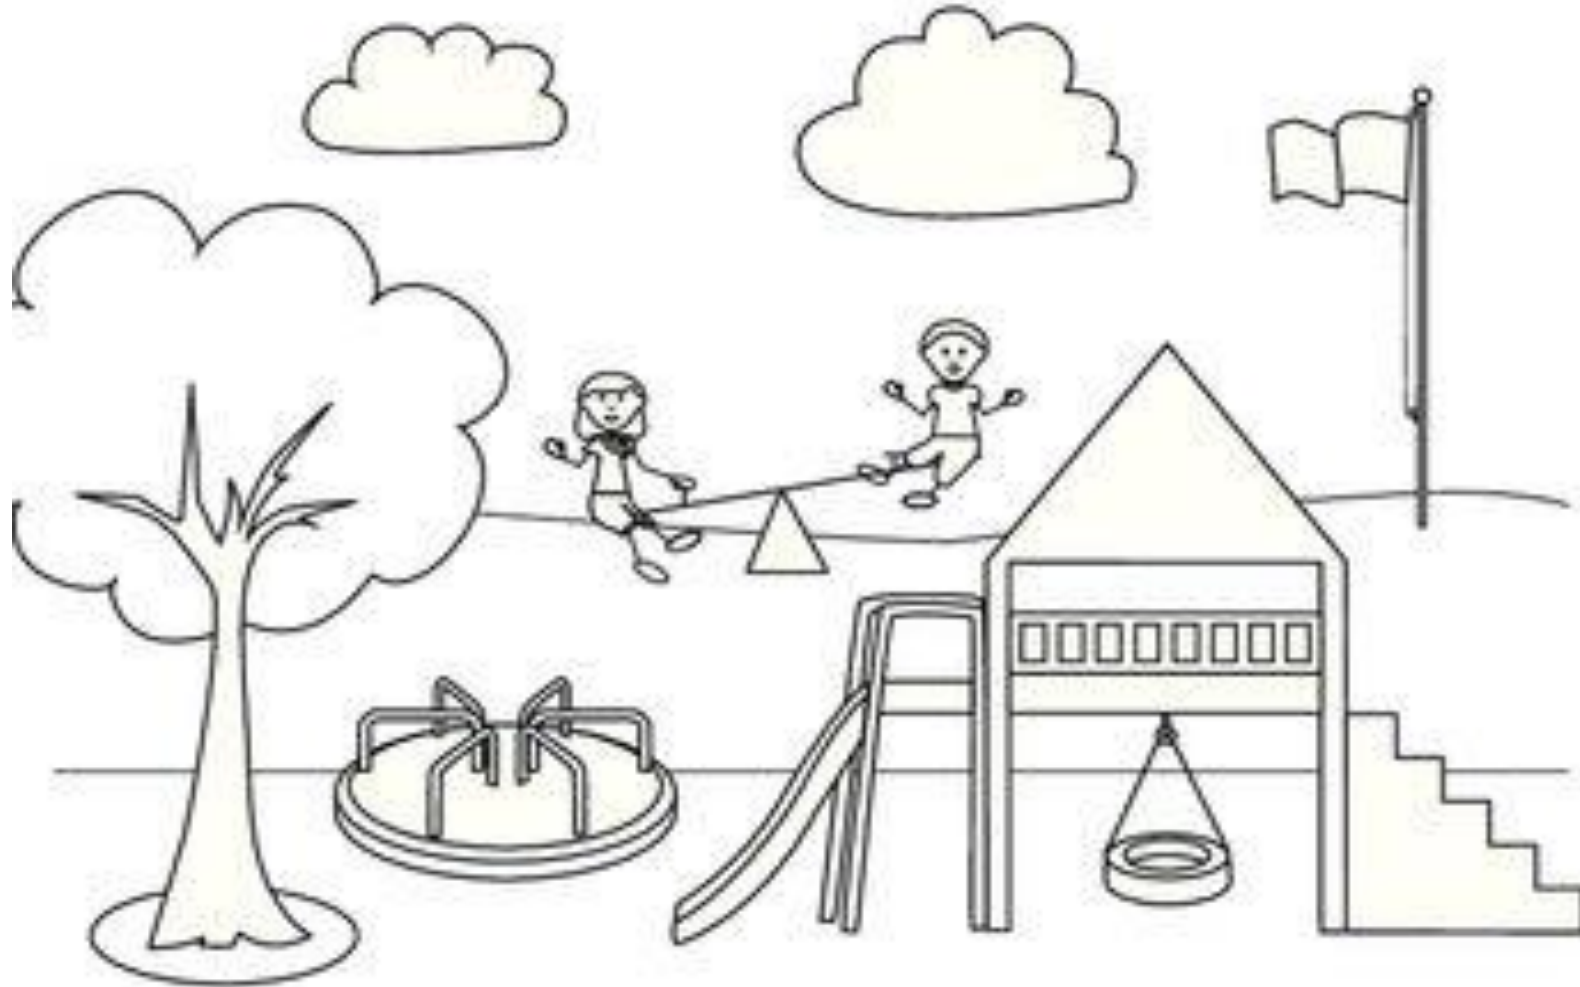

made of two inclined planes and used to push objects apart

Lever	Screw	Wedge	Pulley

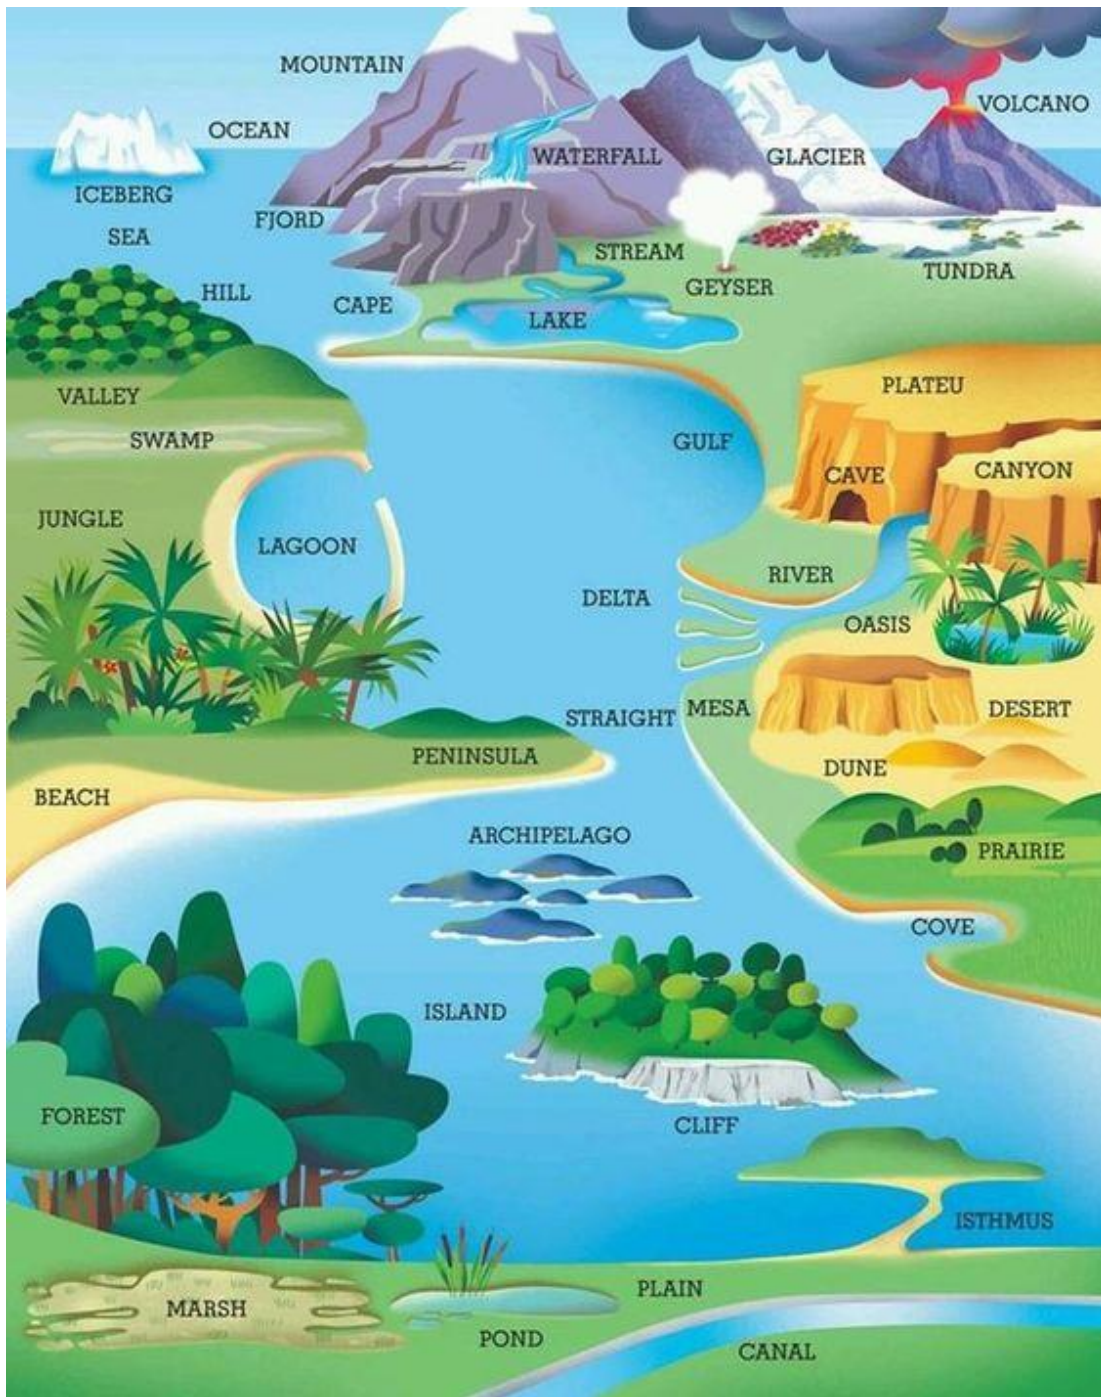

**Science Choice 2-** Can you find the Simple Machines being used on the playground?  
**Puedes encontrar las maquinas simples siendo utilizados en el patio de recreo?**

Play it Simple

Identify the simple machines on the playground. Color the page.
