Lockdown Drills and Safety Drills

This week we will practice a lock down drill at our school. During a lock down drill, classroom doors are locked, and lights are turned off. Students move away from the any windows and remain silent during the duration of the drill.

We are required to practice two lockdown drills during the first 20 days of every school year and one additional drill after the first 60 days of the school year and one during the 2nd semester of school. This will be the required drill for 2nd semester.

Throughout the school year we will practice a variety of drills in order to make sure all our staff and students know what to do in case of a real emergency. We have practiced fire drills, additional lock down drills, tornado drills, earthquake drills as well as other types of drills.

We explain these drills as a way for us all to know what we need to do in case of a fire or emergency and as an extra layer of protection and security, similar to homes which have more than one lock on their front door and to make sure all students and teachers are always safe at school. If your student has any concerns with any of these drills, please let your child's teacher and/or one of our school counselors know so they can follow up with your student.

Please understand that Prince William County Public Schools requires each school to participate in these drills for the safety and protection of all our students, staff, and visitors.

The safety of our students and staff is always our highest priority.

Report Cards

The end of the third quarter is April 8 and report cards will be available in ParentVUE by April 19. Please let your child's teacher know if you have any questions.
